

Triumph Introduces the 2011 Sprint GT For All the Roads Ahead

New sport touring bike offers performance and practicality

ONTARIO (May 17, 2010) – Five years after Triumph introduced the popular 1050cc Sprint ST sports touring bike, the British marque has introduced a new model with greater practicality and more emphasis on the ‘touring’ aspect of ‘sports touring’: the Triumph Sprint GT.

As you would expect from a British machine wearing the famous Grand Tourer tag, the Sprint GT delivers outstanding real world performance in a practical and stylish package. But this should not be construed that the Sprint GT has lost the sporting edge that made the Sprint ST one of the most popular and enduring bikes in the Triumph range.

“Sprint Riders asked us for more luggage capacity and additional wind and weather protection without losing the famous ST handling & performance,” said Chris Ellis, General Manager of Canadian Operations for Triumph Motorcycles. “The Sprint GT blends all of the great performance and style of the Sprint ST with some additional comfort and storage space that sport touring riders are looking for.”

The GT features a newly-styled and better performing front fairing which has been restyled to give a sharper and more contemporary look while retaining the distinctive three-light Sprint design. In the cockpit, riders will find a comprehensive three dial instrument panel with a large, traditional analogue speedometer and tachometer while the third dial hosts the readout for the onboard computer where the rider can scroll through fuel consumption, range-to-empty, journey time, average speed and clock functions.

Performance is handled by an updated version of Triumph’s legendary 1050cc triple. First introduced in the 2005 Sprint ST, the latest incarnation of this great engine has been updated to

deliver increased power, torque and usability. With 130bhp on hand, the Sprint GT offers excellent real world performance, with development focused on power delivery in the mid-range rather than chasing peak power.

Of course, practicality is the GT's hallmark. The bike also features new 31 liter saddlebags, standard ABS brakes, a 200-mile fuel range, an optional top box that is capable of accommodating two full-sized helmets, and a 12 volt power supply that allows 'on the go' charging of electrical items such as laptops and mobile phones.

The result is a motorcycle with a different feel to the Sprint ST, biased more towards the 'touring' side of sports touring than the Sprint ST's 'sports' – a composed machine with precise and intuitive handling to keep up with sports bikes on demanding roads, but equally delivering the comfort required for a long two-up ride cross-country.

Priced at \$14,399, the Sprint GT will be available in Canadian dealerships this fall as early release 2011 models.

Of course, there is a full range of accessories that includes a host of options designed to further increase the practicality of the Sprint GT and allow riders to personalize the motorcycle to their specific needs. These include heated handlebar grips, a taller aero screen, optional gel comfort seat and high quality magnetic tank bags which can increase the Sprint GT's luggage capacity another 30 liters.

The full range of Triumph motorcycles are available at authorized Triumph dealers throughout North America. To find your local Triumph dealer, please visit

www.TriumphMotorcycles.com/Canada.

- END -

Triumph Motorcycles (www.TriumphMotorcycles.com) is the British motorcycle marque that produces a wide range of sport, cruiser and touring motorcycles that are all designed to provide outstanding motorcycling experiences. From the storied Bonneville to the class-leading Speed Triple, Triumph offers a blend of design, character and performance that result in truly distinctive motorcycles. First established in 1902 and now located in Hinckley, Leicestershire, England, Triumph has always set the pace for category winning machines. The company is solely owned by Bloor Holdings Ltd. and its North American operations are based in Atlanta.
