

Triumph Thunderbird Storm

- Powerful 1700cc version of Triumph's award-winning T-16 engine delivers 97bhp and 115 lb-ft. of torque
- Aggressive blacked-out look with twin streetfighter headlights
- Low, 700mm seat height for classic look and easy riding
- Powerful four-piston brakes with optional ABS
- Two-year unlimited mileage warranty

The Triumph Thunderbird Storm is a power cruiser for riders who expect a harder edge to their ride.

Powered by a big bore, 1700cc version of Triumph's acclaimed T-16 parallel-twin engine, the Thunderbird Storm's massive 107mm pistons pump out a muscular 97bhp, with a meaty 115 lb-ft. of torque at just 2950rpm.

The Thunderbird Storm utilizes the chassis of Triumph's award-winning Thunderbird, a cruiser renowned for its outstanding poise and precision, but is wrapped up in a pared-down, punked-up look.

Triumph's iconic twin headlights – made famous on the Rocket III and Speed Triple models – and drag bars perfectly fit this street rod's aggressive nature and are complemented by the gloss Jet Black or classic Matte Black paint options and the matching blacked-out engine cases.

The low 27.5" seat height provides a sumptuous laid-back riding position, while the handling pleasantly surprises cruiser and non-cruiser riders alike. Triumph is renowned for its ability to make fine handling motorcycles, and the Thunderbird Storm is no exception. With 47mm forks up front and five-way adjustable twin shocks at the rear, the Triumph delivers a compliant and accurate ride in all conditions, while well-appointed twin 310mm floating discs up front are grabbed by powerful four-piston brakes for progressive stopping power. An optional ABS system is available for increased rider security.

High-performance Metzeler Marathon tires, developed especially for the Thunderbird range, adorn five-spoke cast alloy wheels and inspire confidence while cornering. And while the look may be minimalist, the Thunderbird Storm's specification sheet certainly isn't.

This power cruiser oozes quality. From the premium components to the attention to detail and distinctive new Triumph script on the tank, this is a machine for the discerning rider looking for a distinctive alternative to the mainstream offerings.

The tank-mounted speedo includes a comprehensive on-board computer which includes a clock, two trip meters and fuel gauge, in addition to a small and stylish tachometer. A range of almost 100 accessories is available for the Thunderbird Storm, giving owners the chance to personalize their bikes to meet their own needs and tastes.
