

## Triumph Tiger 800

- Class-leading 94bhp, 799cc three-cylinder engine
- Adjustable seat height and handlebar position
- Switchable ABS option
- Coded key immobilizer for added security
- 645w generator can power multiple electrical accessories
- Wide range of official accessories offer even more practicality

Designed from the ground up to meet the demands of some of the most discerning motorcyclists, the Tiger 800 comes highly specified and delivers a unique experience for the adventure-minded rider.

This unique experience comes courtesy of the new three-cylinder 799cc powerplant, delivering a class-leading 94bhp and an extremely accessible 58 lb-ft. of torque. With its flat torque curve and smooth power delivery, the Tiger 800 has been designed to be easy to ride in all conditions, including off-road.

The Tiger 800 features a tough steel frame capable of carrying large amounts of luggage and coping with the rough and tumble world of off-road riding. Ten-spoke alloy wheels, 19" at the front and 17" at the rear, allow for the use a wide range of tires, from dirt-biased dual purpose items to pure road rubber for those who wish to take advantage of the Tiger 800's qualities as an excellent bike to commute and tour on. A class-leading 5.0 gallon fuel tank ensures infrequent stops for the Tiger 800 rider.

Triumph has given the Tiger 800 a high specification direct from the factory. Inverted 43mm front forks are graced with twin 308mm floating brake discs and two-piston floating calipers. A sophisticated anti-lock braking system is available as an option and can be turned off when riding on tricky terrain.

At 462 lbs. including a full tank of fuel, the Tiger 800 is a very manageable machine. The rear shock is adjustable for preload and the Tiger 800 can be tailored to meet the rider's personal taste through the adjustable aluminium handlebars and seat, which can be set at 31.9" or 32.7", with lower and higher seat options available as official accessories. A rear rack with generous pillion grab handles is also standard, while a coded-key immobilizer prevents theft through "hot wiring."

The comprehensive instrumentation includes a fuel gauge and trip computer, while a high-specification 645w generator is included to allow riders to safely power electrical accessories such as heated grips, auxiliary lights and satellite navigation equipment. A huge range of official Triumph accessories has been developed for the Tiger 800's launch, including numerous hard- and soft-luggage solutions, tire pressure monitor sensors, adjustable touring screen, centerstand, off-road style hand guards, bash plates and high-level front fender.

Three color options are available for the Tiger 800: Crystal White, Phantom Black and Venom Yellow, with the adoption of a graphite colored frame for the 2012 model year.
